**Well
tower**

Forward Looking Statements and Risk Factors

This document contains “forward-looking statements” as defined in the Private Securities Litigation Reform Act of 1995. When Welltower uses words such as “may,” “will,” “intend,” “should,” “believe,” “expect,” “anticipate,” “project,” “pro forma,” “estimate” or similar expressions that do not relate solely to historical matters, Welltower is making forward-looking statements. These statements include, among others, the strategic data science partnership and their anticipated benefits, management's expectations regarding the Company's future financial performance and condition, including the favorable impact of acquisitions, the Company's business and investment strategy, and the Company's expectations regarding future market trends. Forward-looking statements are not guarantees of future performance and involve risks and uncertainties that may cause Welltower's actual results to differ materially from Welltower's expectations discussed in the forward-looking statements. This may be a result of various factors, including, but not limited to: the data science licensing might not be expanded to additional partners and any current or future partnership might not achieve its anticipated benefits; the impact of macroeconomic and geopolitical developments, including economic downturns, elevated inflation and interest rates, political or social conflict, unrest or violence or similar events; the status of the economy; the status of capital markets, including availability and cost of capital; issues facing the healthcare industry, including compliance with, and changes to, regulations and payment policies, responding to government investigations and punitive settlements, and operators' / tenants' difficulty in cost effectively obtaining and maintaining adequate liability and other insurance; changes in financing terms; competition within the healthcare and seniors housing industries;

negative developments in the operating results or financial condition of operators/tenants, including, but not limited to, their ability to pay rent and repay loans; Welltower's ability to transition or sell properties with profitable results; the failure to make new investments or acquisitions as and when anticipated; natural disasters, public health emergencies and extreme weather affecting Welltower's properties; Welltower's ability to re-lease space at similar rates as vacancies occur; Welltower's ability to timely reinvest sale proceeds at similar rates to assets sold; operator/ tenant or joint venture partner bankruptcies or insolvencies; the cooperation of joint venture partners; government regulations affecting Medicare and Medicaid reimbursement rates and operational requirements; liability or contract claims by or against operators/tenants; unanticipated difficulties and/or expenditures relating to future investments or acquisitions; environmental laws affecting Welltower's properties; changes in rules or practices governing Welltower's financial reporting; the movement of U.S. and foreign currency exchange rates and changes to U.S. and global monetary, fiscal or trade policies; Welltower's approach to artificial intelligence; Welltower's ability to maintain its qualification as a REIT; key management personnel recruitment and retention; geopolitical tensions or conflicts, such as the ongoing conflict between Russia and Ukraine and in the Middle East; and other risks described in Welltower's reports filed from time to time with the SEC. Welltower undertakes no obligation to update or revise publicly any forward-looking statements, whether because of new information, future events or otherwise, or to update the reasons why actual results could differ from those projected in any forward-looking statements.

Third Quarter 2026 Key Highlights

Seniors Housing Operating Portfolio Organic Growth¹

Third Quarter Investment Activity

Driven by organic growth and portfolio expansion, we have achieved:

Maintaining exceptionally low leverage while investing in talent and systems:

1. Growth metrics reflect same store performance as compared to 3Q25
Note: See “Supplemental Financial Measures” at the end of this presentation for definitions and reconciliations of non-GAAP financial measures. Pro rata investment activity includes property acquisitions and loan funding; exclusive of development funding completed in the third quarter of 2026. “FFO” represents normalized funds from operations per diluted share

3Q26 Key Highlights

25%

FFO per diluted share growth

- Reported normalized FFO per diluted share of \$1.67, an increase of 25% year-over-year, driven by strong seniors housing operating (SHO) portfolio growth, capital allocation activity, and contributions from Welltower Business System (WBS) initiatives
- Midpoint of full-year FFO per share guidance raised by 10¢ to \$6.50

21%

Net operating income growth

- SHO portfolio same store net operating income (SSNOI) increased 21%, driven by organic revenue growth and substantial operating margin expansion
- Dual drivers of revenue growth remain firmly intact as the methodical handover from occupancy growth to greater pricing power is occurring as planned
 - End-market demand for luxury senior living remained resilient against a backdrop of rising macro uncertainty with sequential average occupancy growth of 120 basis points (“bps”) exceeding the 110 bps sequential gain in 3Q25; year-over-year average occupancy increased 320 bps
 - RevPOR (unit revenue) growth improved to 5.3%, reflecting shrinking capacity within the system coupled with **robust pricing power for luxury senior living communities with strong product market fit**

310 bps

NOI margin expansion

- Unit economics remained compelling as the sustained spread between RevPOR and ExpPOR (unit expense) growth drove 310 bps of margin expansion
 - Expense growth remained muted despite rising inflationary pressure across the economy with ExpPOR growth of 0.8%
 - **Flow-through margin reached a near-record high**, driven primarily by stronger rate growth, resulting in a greater share of each incremental revenue dollar converting to cash flow

\$21 billion

YTD Pro rata investment activity

196 Transactions

\$35.5M Median Size

- Announced \$21.0 billion of YTD pro rata investment activity¹, inclusive of \$13.3 billion closed through 3Q26 and \$7.7 billion of additional investment activity closed or under contract to close as of October 26, 2026
 - Full-year investment activity remains highly granular across 196 different transactions with a median size of \$35.5 million
 - SHO communities acquired during 3Q26 carry an average age of approximately 4 years and in-place occupancy of ~66%. **Our ability to drive cash flow growth post-acquisition has meaningfully improved** by leveraging WBS and the joint efforts of our world-class technology talent and core operating partners
- Closed or announced \$6.0 billion of dispositions and loan repayments² year-to-date with capital primarily recycled into SHO assets

Note: All metrics reflect year-over-year same store results for the third quarter 2026 unless otherwise noted. See “Supplemental Financial Measures” or the Supplemental Information Report for definitions and reconciliations of non-GAAP financial measures

¹ As of October 26, 2026; pro rata investment activity exclusive of development funding and subject to customary closing conditions

² Inclusive of \$1.9 billion of expected pro rata disposition proceeds

Increased 2026 Guidance

SHO portfolio outperformance and investment activity driving 10¢ increase to Normalized FFO per diluted share guidance midpoint

Increased FY2026 Same Store NOI Guidance <u>Midpoints</u>				
Segment	Initial Guidance	1Q26 Update	2Q26 Update	3Q26 Update
SHO	18.0%	19.0%	20.0%	21.0%
SH NNN	3.5%	3.5%	4.0%	4.0%
OM	2.5%	2.5%	2.5%	2.5%
Skilled Nursing	2.5%	2.5%	2.5%	2.5%
Total Portfolio	13.5%	14.1%	14.9%	15.6%

2025 to 2026 Normalized FFO Per Diluted Share Guidance Bridge					
	Initial Guidance	1Q26 Update	2Q26 Update	3Q26 Update	3Q26 Update vs 2Q26 Guidance
FY2025 Normalized FFO Per Diluted Share	\$5.29	\$5.29	\$5.29	\$5.29	-
(+) Seniors Housing Operating NOI	0.58	0.61	0.64	0.67	0.03
(+) Outpatient Medical and Triple-Net	0.02	0.02	0.02	0.02	-
(+) Investment & Financing Activity	0.30	0.37	0.45	0.505	0.055
(+) <u>G&A</u>	(0.02)	(0.02)	(0.02)	(0.02)	-
(+) <u>Income Taxes & Other</u>	-	0.01	0.02	0.035	0.015
FY2026 Normalized FFO Per Diluted Share at Midpoint	\$6.17	\$6.28	\$6.40	\$6.50	0.10

Note: See "Supplemental Financial Measures" at the end of this presentation for definitions and reconciliations of non-GAAP financial measures

Outlook Assumptions

- **Total portfolio NOI:** Increased SHO NOI growth expectations are driving a 70 bps increase at the midpoint of the range
- **SHO NOI:** Positive revenue and expense trends are expected to drive SS SHO Portfolio NOI growth of 21.0% at the midpoint of the range, which represents a 100 bps increase vs. the prior midpoint
- **SHO revenue:** SS revenue growth guidance of 9.3% driven by:
 - Year-over-year occupancy growth of ~350 bps
 - Full-year RevPOR growth of 5.1%, reflecting healthy levels of pricing power across all regions
- **SHO expenses:** SS expense growth of 4.6% in 2026 as compared to previous guidance of 5.0%. Guidance now implies ExpPOR growth of 0.6%, reflective of further operational scaling at higher occupancy levels

Guidance Bridge Commentary

- **Investments:** Guidance includes **\$21.0 billion** of pro rata investments closed or under contract to close

- **Dispositions:** Guidance contemplates **\$6.0 billion** of dispositions and loan repayments closed or under contract to close, including \$1.9 billion of announced dispositions

- **Guidance:** Earnings guidance includes only those acquisitions closed, or under contract to close. No transitions, restructures, capital activity, or speculative investment activity beyond those announced to date are included

Enhanced Long-Term Growth Profile

Cash flow growth trajectory meaningfully amplified by both the transformation into a pure-play rental housing platform for an aging population and Welltower Business System initiatives

Welltower's Data Science Advantage

Data Science Platform compresses transaction execution from months down to weeks, providing sellers with significantly greater certainty of close

Welltower typically completes transactions in 45 – 60 days as compared to a traditional marketed sales process which may take 5 – 10 months. Welltower closes transactions before first round bids are received in a traditional process

Welltower's Transaction Timeline

Marketed Transaction Timeline

Since 2016

\$110B

High-quality, granular capital allocation activity¹

1. Includes closed or announced pro rata gross investments, dispositions, and loan repayments

Data Science Platform Advantage | Remaining Disciplined with Shareholder Capital

Platform enables selectively at scale; optimizing for price, location, product market fit, and operator

Global Financial Crisis Case Study

Resilient demand during GFC driven by needs-based nature of seniors housing

Sources: NIC MAP Vision, CoStar and Bloomberg

Seniors Housing Supply Constraints

Current Macroeconomic Conditions Exacerbating Construction and Financing Challenges

The factors constraining new supply first highlighted in 2024 remain relevant today

Seniors housing supply likely constrained through 2030+

Considerations Impacting Development Economics

Inflation: De-Globalization, Tariffs, and Labor

- Deglobalization may result in significantly higher long-run cost of production and sourcing of goods, raw materials, and labor
- Many commodities used in construction are sourced from countries targeted for new or increased tariffs
- Policy changes regarding undocumented workers have impacted the availability of construction laborers, disproportionately impacting the industry and increasing construction costs

Interest Rates: Short-End and Long-End

- The Federal Reserve, ECB, and Bank of Japan have recently raised short-term policy interest rates and signaled the potential for a more restrictive policy stance
- Countries which have historically maintained a large trade surplus and high savings (i.e., Germany, Japan, and China) are also amongst the largest purchasers of US Treasuries
- Growing US budget deficit may increase the supply of Treasuries; higher nominal growth may also alter the Fed's rate path

Construction and Replacement Costs

Higher costs...

- Are likely to be passed through to end users, including seniors housing developers
- Drive replacement costs higher across the seniors housing industry, benefiting owners of existing assets

Higher long-term rates...

- Will negatively impact developers' and lenders' exit underwriting through an increase in exit cap rates and permanent financing costs
- Pressure existing developers and owners who need to refinance maturing debt and/or address expiring floating rate caps

Why Luxury Seniors Housing Development Has Not Returned

Seniors housing-specific economics, rather than macro factors alone, keep construction starts near record lows

Debt and Equity Costs

- Benchmark rates continue to pressure project economics
- Meaningful interest-rate relief and higher development yields are needed for speculative development to resume at scale

Competition for Capital and Resources

- Development capital is increasingly shifting toward higher-yielding sectors, particularly data centers and infrastructure
- Data center projects underwrite to double-digit development yields, well above what seniors housing rents can support
- Data center construction spending has increased 8x since 2019, vs 1.4x for all other private non-residential construction¹

Structural Complexity

- **Multi-year entitlement and construction timelines** delay supply response even after market conditions improve
- Post-COVID industry attrition has disbanded experienced development teams, resulting in the loss of institutional knowledge
- Purpose-built senior housing is inherently less efficient to develop and therefore meaningfully more expensive to build vs. other property types – **a structural barrier independent of interest rates**

Quarterly Seniors Housing Construction Starts

1. Census Bureau for US Private Construction Spending (SAAR). Private non-residential construction excludes educational, religious, amusement and recreation, and transportation construction
2. NIC MAP Vision

Luxury Seniors Housing Is Structurally Complex and ~2x Costlier to Build Than Multifamily

Lower building efficiency drives materially higher per unit development costs compared to multifamily

Multifamily vs. Seniors Housing Development^{1,2}
Illustrative Cost Per Unit by Category - Indexed to Multifamily

Why the Gap Exists

- **Less efficient build:** a greater proportion of a seniors housing community's footprint is consumed by amenity and care space; **seniors housing delivers ~50% net rentable square footage vs ~80% for multifamily**
- A seniors housing community is costlier per foot to build given specialized construction and care requirements
- At today's cost basis, **new seniors development requires rents meaningfully above prevailing market levels**, a structural barrier independent of interest rates

1. Associated Builders and Contractors, 2026 workforce forecast
2. Cost basis bridge based on internal Welltower estimates for a luxury senior living community; illustrative and subject to change

Extended Timeline From Project Formation to Stabilization

Even if developers can overcome stubbornly high construction costs and rates, a significant timeline to stabilization exists

Average time to stabilization totals approximately 7 years with many projects in high-barrier-to-entry markets taking significantly longer

Welltower 3.0: Widening Our Moat

Welltower Transformation | Establishing Foundation for Long-Term Compounding of Per Share Growth

	Welltower 1.0 4Q15 – 4Q19 <u>Key Theme:</u> Painful but necessary restructuring to reset identity, governance, and shareholder alignment	Welltower 2.0 1Q20 – 2Q25 <u>Key Theme:</u> Leveraging crisis to cement industry leadership, build resilience, and extend long-term competitive advantages	Welltower 3.0 3Q25 and beyond <u>Key Theme:</u> Blending real estate (hardware) with operational and technological (software) capabilities
Operating Partners	Establish greater alignment with operating partners via RIDEA 3.0/4.0 contracts	Transition of hundreds of properties to best-in-class regional operating partners Focus on creating win-win partnerships, with all parties sharing in upside	Completion of economic alignment structure with operating partners Front-line staff integrated in “ <u>ownership works</u> ” mentality
Technology	Inception of data science platform to transform real estate investing through scaling of an unscalable business	Launch of Welltower Business System and other high-ROI operational investments to expand the duration & resilience of our moat Maturation of data science platform from machine learning to deep learning to AI	Significant ramp in technology investment Formation of Welltower “Tech Quad” and subsequent expansion to “Tech Squad” Prioritizing customer and site-level employee satisfaction as primary KPI
Capital Allocation	Transformative disposition program resulting in higher quality asset base and stronger operator partnerships	Significant shift in capital allocation towards acquisitions and growth Advanced regional densification strategy with intent of going deep in markets	External investments to go deeper in a market Optionality to lean into low-leveraged balance sheet to drive growth
	Centralized capital allocation, de-centralized execution	Centralized capital allocation, de-centralized execution with strong asset management	Operating company in a real estate wrapper: operations & technology first with complementary capital allocation

From Tech Quad to Tech SQUAD: Meaningfully Increasing Talent Density

"A's" Hire "A's"

Attraction of the Welltower platform for tech talent:

- 1

Growing concerns regarding "SaaSpocalypse"
- 2

"Heavy Asset, Low Obsolescence" sector that cannot be replaced by AI
- 3

Opportunity to transform a critically important industry while creating substantial value for existing investors

Tech Quad leaders have rapidly recruited talent from industries with higher standards

Welltower 3.0 | Vertically Integrated Hardware + Software Model

Key Theme: Welltower 3.0 marks the convergence of real estate (hardware) and operational & technological (software) capabilities to strengthen long-term positioning. By obsessively focusing on operations, technology and capital allocation, Welltower has secured its place as the best owner of assets by being the employer, partner, and investor of choice

Vertical integration of our model creates a powerful, compounding network effect that is only beginning to unfold

Welltower 3.0: Cascading Our “All-In” Culture to Operating Partners

Deepening economic alignment between shareholders, Welltower management, key operating partners, and frontline staff

Example of the Welltower Fellowship Grant competition in action at a StoryPoint community. StoryPoint’s 1440 mantra is focused on creating the absolute best experience for every person every minute of every day

Three Layers of Economic Alignment:

01

Welltower executive leadership

Duration-matched with long-term shareholders

Management is fully aligned with shareholders through an “all-in” equity participation plan, forgoing traditional annual compensation for the next decade in favor of a one-time equity grant

02

Welltower’s key operating partners

“All-in” via RIDEA 6.0

The founding class of RIDEA 6.0 operators, including Cogir, Oakmont, and StoryPoint, have gone “all-in” alongside Welltower’s management and have elected to receive a significant portion of their incentive fee in the form of Welltower operating partnership units

03

Frontline staff

\$10M annual Welltower Fellowship Grant

The annual \$10 million Welltower Fellowship Grant to honor the memory of Charles T. Munger will be divided among Welltower’s best performing communities and payable solely to frontline workers in the form of Welltower stock. Team members who drive innovation to improve resident satisfaction and quality of care for seniors, as well as achieving operational results and performance improvement goals, will be eligible for these awards

Welltower's Unique Value Creation Flywheel

Established competitive advantages driving long-term shareholder value creation

Welltower Value-Add and Moat through Best-in-Class:

- Local & regional operators: Superior managers with significant regional density operating under highly aligned RIDEA contracts
- Tech Squad: Bringing technology, enterprise-wide innovation, and unparalleled data science platform to tech poor seniors housing industry
- Welltower Business System: Institutionalization of portfolio expected to drive further efficiencies while improving both the resident and employee experience

Properties are worth substantially more on Welltower's platform

Capital Allocation

- Macroeconomic uncertainty and capital markets dislocation creating opportunities to acquire assets at attractive basis, going-in yields, and unlevered IRRs
- Granular approach to capital allocation provides opportunity to acquire assets at deep discounts to replacement cost while complementing Welltower's regional density strategy
- Completed \$52 billion of investments since 4Q20 at attractive high-single-digit to low-double-digit unlevered IRRs with potential for further upside from Welltower platform enhancements

Internal Growth

- Long-term demographic tailwinds and significant decline in new supply expected to drive continued outsized growth for extended period
- RevPOR growth (unit revenue) expected to continue to outpace ExpPOR growth (unit expense), resulting in further operating margin expansion
- Industry-leading results being driven by Welltower's superior micro-market locations, disciplined capital allocation strategy, and highly aligned partners with significant regional density

Superior Ability to Capitalize the Opportunity

- Access to a plurality of capital sources including common equity, private equity, unsecured and secured debt, and exchangeable notes
- Ability to opportunistically pivot between each capital source based upon cost and availability
- Robust near-term available liquidity (including cash on hand, line of credit capacity, expected loan payoffs and disposition proceeds) can fully fund announced acquisitions

Welltower competes on Data Science, Welltower Business System, capital allocation capabilities, and unique culture - NOT cost of capital

Seniors Housing Trends

Societal & Technological Trends | Impact on Real Estate Sectors

Precedent for extended period of compounding cash flow growth driven by shifting secular tailwinds

Occupancy Growth Outpacing Historical Trends

Sequential occupancy gains remain elevated through 3Q26

1. Represents SHO same store portfolio each quarter at pro rata ownership; see each quarter's respective Supplemental Information Report

Seniors Housing Utilization Rate Expected to Increase Given Demographic & Societal Trends

Growth of 80+ age cohort rapidly exceeding available FAMILIAL CAREGIVERS, leading to increased demand for seniors housing

Decline in familial caregivers creating “Sandwich Generation” with nearly a quarter also having children under the age of 18

1. Organisation for Economic Co-operation and Development and US Census Bureau

2. Current caregiver population calculated as those born between 1959 and 1979 from a base year of 2025. Caregiver population over the next 25 years represents individuals born in 1975 through 1995 that will be 45 – 65 years old in 2040

units acquired

- Initial yield of 6.8%
- Stable yield of approximately 8.5%
- Low last-dollar exposure and innovative structure offer downside protection
- Expected to generate high-single-digit to mid-teens unlevered IRRs to Welltower

- Predictive analytics and proprietary operator relationships used to execute off-market investments
- Maximizing risk-adjusted return to Welltower through creative investments across the capital stack
- Debt investments offer equity upside in form of warrants and/or bargain purchase options
- Acquisitions executed at an average investment of \$26 million per property

- Investments made at significant discount to replacement cost offer enhanced downside protection
- Limited recent market transactions priced above replacement cost serves to further curtail new supply

1. Includes pro rata investments across acquisitions and loans since October 1, 2020 through September 30, 2026 and excludes development funding

Appendix & Supplemental Financial Measures

Non-GAAP Financial Measures

We believe that revenues, net income and net income attributable to common stockholders ("NICS"), as defined by U.S. generally accepted accounting principles ("U.S. GAAP"), are the most appropriate earnings measurements. However, we consider Funds from Operations ("FFO"), Normalized FFO, Net Operating Income ("NOI"), Same Store NOI ("SSNOI"), RevPOR, ExpPOR, Same Store RevPOR ("SS RevPOR"), Same Store ExpPOR ("SS ExpPOR"), EBITDA and Adjusted EBITDA to be useful supplemental measures of our operating performance. Excluding EBITDA and Adjusted EBITDA these supplemental measures are disclosed on our pro rata ownership basis.

Pro rata amounts are derived by reducing consolidated amounts for minority partners' noncontrolling ownership interests and adding our minority ownership share of unconsolidated amounts. We do not control unconsolidated investments. While we consider pro rata disclosures useful, they may not accurately depict the legal and economic implications of our joint venture arrangements and should be used with caution.

Our supplemental reporting measures and similarly titled financial measures are widely used by investors, equity and debt analysts and rating agencies in the valuation, comparison, rating and investment recommendations of companies. Our management uses these financial measures to facilitate internal and external comparisons to historical operating results and in making operating decisions. Additionally, these measures are utilized by the Board of Directors to evaluate management performance.

None of the supplemental reporting measures represent net income or cash flow provided from operating activities as determined in accordance with U.S. GAAP and should not be considered as alternative measures of profitability or liquidity. Finally, the supplemental reporting measures, as defined by us, may not be comparable to similarly titled items reported by other real estate investment trusts or other companies. Multi-period amounts may not equal the sum of the individual quarterly amounts due to rounding.

FFO and Normalized FFO

Historical cost accounting for real estate assets in accordance with U.S. GAAP implicitly assumes that the value of real estate assets diminishes predictably over time as evidenced by the provision for depreciation. However, since real estate values have historically risen or fallen with market conditions, many industry investors and analysts have considered presentations of operating results for real estate companies that use historical cost accounting to be insufficient. In response, the National Association of Real Estate Investment Trusts ("NAREIT") created FFO as a supplemental measure of operating performance for REITs that excludes historical cost depreciation from net income. FFO attributable to common stockholders, as defined by NAREIT, means net income attributable to common stockholders, computed in accordance with U.S. GAAP, excluding gains (or losses) from sales of real estate and acquisitions of controlling interests and impairments of depreciable assets, plus real estate depreciation and amortization, and after adjustments for unconsolidated entities and noncontrolling interests. Normalized FFO attributable to common stockholders represents FFO adjusted for certain items detailed in the reconciliations and described in our earnings press releases for the relevant periods.

We believe that Normalized FFO attributable to common stockholders is a useful supplemental measure of operating performance because investors and equity analysts may use this measure to compare our operating performance between periods or to other REITs or other companies on a consistent basis without having to account for differences caused by unanticipated and/or incalculable items.

NOI, SSNOI, RevPOR, ExpPOR, SS RevPOR & SS ExpPOR

We define NOI as total revenues, including tenant reimbursements, less property operating expenses. Property operating expenses represent costs associated with managing, maintaining and servicing tenants for our properties. These expenses include, but are not limited to, property-related payroll and benefits, property management fees paid to operators, marketing, housekeeping, food service, maintenance, utilities, property taxes and insurance. General and administrative expenses represent general overhead costs that are unrelated to property operations and unallocable to the properties. These expenses include, but are not limited to, payroll and benefits related to corporate employees, professional services, office expenses and depreciation of corporate fixed assets.

SSNOI is used to evaluate the operating performance of our properties using a consistent population which controls for changes in the composition of our portfolio. As used herein, same store is generally defined as those revenue-generating properties in the portfolio for the relevant year-over-year reporting periods. Acquisitions and development conversions are included in the same store amounts five full quarters after acquisition or being placed into service. Land parcels, loans and leased properties, as well as any properties sold or classified as held for sale during the period, are excluded from the same store amounts. Redeveloped properties (including major refurbishments of a Seniors Housing Operating property where 20% or more of units are simultaneously taken out of commission for 30 days or more or Outpatient Medical properties undergoing a change in intended use) are excluded from the same store amounts until five full quarters post completion of the redevelopment. Properties undergoing operator transitions and/or segment transitions are also excluded from the same store amounts until five full quarters post completion of the operator transition or segment transition. In addition, properties significantly impacted by force majeure, acts of God or other extraordinary adverse events are excluded from same store amounts until five full quarters after the properties are placed back into service. SSNOI excludes non-cash NOI and includes adjustments to present consistent property ownership percentages and to translate Canadian properties and UK properties using a consistent exchange rate. Normalizers include adjustments that in management's opinion are appropriate in considering SSNOI, a supplemental, non-GAAP performance measure. None of these adjustments, which may increase or decrease SSNOI, are reflected in our financial statements prepared in accordance with U.S. GAAP. Significant normalizers (defined as any that individually exceed 0.50% of SSNOI growth per property type) are separately disclosed and explained in the relevant supplemental reporting package.

We believe NOI and SSNOI provide investors relevant and useful information because they measure the operating performance of our properties at the property level on an unleveraged basis. We use NOI and SSNOI to make decisions about resource allocations and to assess the property level performance of our properties. No reconciliation of the forecasted range for SSNOI on a combined basis or by property type is included in this release because we are unable to quantify certain amounts that would be required to be included in the comparable GAAP financial measure without unreasonable efforts, and we believe such reconciliations would imply a degree of precision that could be confusing or misleading to investors.

RevPOR represents the average revenues generated per occupied room per month and ExpPOR represents the average expenses per occupied room per month at our Seniors Housing Operating properties. These metrics are calculated as the pro rata share of total resident fees and services revenues or property operating expenses per the income statement, divided by average monthly occupied room days. SS RevPOR and SS ExpPOR are used to evaluate the RevPOR and ExpPOR performance of our properties under a consistent population, which eliminates changes in the composition of our portfolio. They are based on the same pool of properties used for SSNOI and include any revenue or expense normalizations used for SSNOI. We use RevPOR, ExpPOR, SS RevPOR and SS ExpPOR to evaluate the revenue-generating capacity and profit potential of our Seniors Housing Operating portfolio independent of fluctuating occupancy rates. They are also used in comparison against industry and competitor statistics, if known, to evaluate the quality of our Seniors Housing Operating portfolio.

EBITDA and Adjusted EBITDA

We measure our credit strength both in terms of leverage ratios and coverage ratios. The leverage ratios indicate how much of our balance sheet capitalization is related to long-term debt, net of cash and cash equivalents and restricted cash. We expect to maintain capitalization ratios and coverage ratios sufficient to maintain a capital structure consistent with our current profile. The ratios are based on EBITDA and Adjusted EBITDA. EBITDA is defined as earnings (net income per income statement) before interest expense, income taxes, depreciation and amortization. Adjusted EBITDA is defined as EBITDA excluding unconsolidated entities and including adjustments for stock-based compensation expense, provision for loan losses, gains/losses on extinguishment of debt, gains/losses on disposition of properties and acquisitions of controlling interests, impairment of assets, gains/losses on derivatives and financial instruments, other expenses, other impairment charges and other adjustments deemed appropriate in management's opinion.

We believe that EBITDA and Adjusted EBITDA, along with net income, are important supplemental measures because they provide additional information to assess and evaluate the performance of our operations. We primarily use these measures to determine our fixed charge coverage ratio, which represents Adjusted EBITDA divided by fixed charges. Fixed charges include total interest and secured debt principal amortization. Our leverage ratios, which include net debt to Adjusted EBITDA and consolidated enterprise value, indicate how much of our balance sheet capitalization is related to long-term debt, net of cash and restricted cash. Net debt is defined as total long-term debt, excluding operating lease liabilities, less cash and cash equivalents and restricted cash. Consolidated enterprise value represents the sum of net debt, the fair market value of our common stock and noncontrolling interests. We expect to maintain capitalization ratios and coverage ratios sufficient to maintain a capital structure consistent with our current profile.
